Versione del 8.10.2024

## Programma del corso

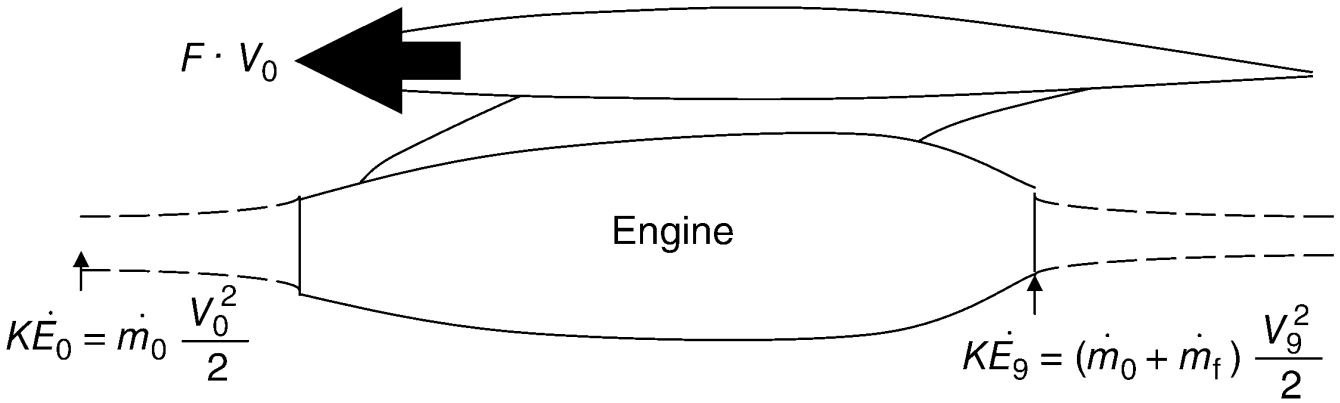
- Introduzione:
  - Storia;

# Programma del corso

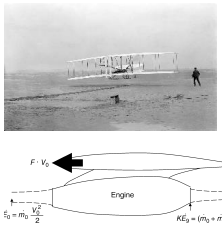
- Introduzione:
  - Storia;
  - Classificazione e componenti;

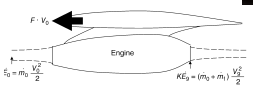
# Programma del corso

- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;

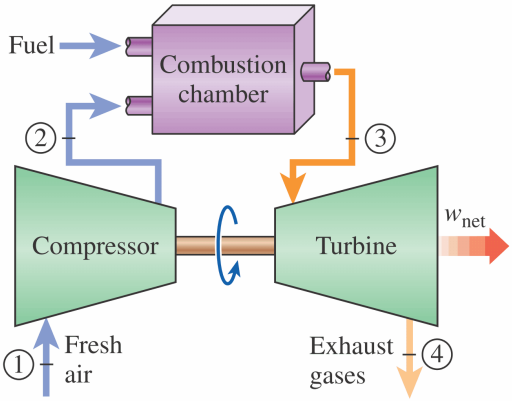


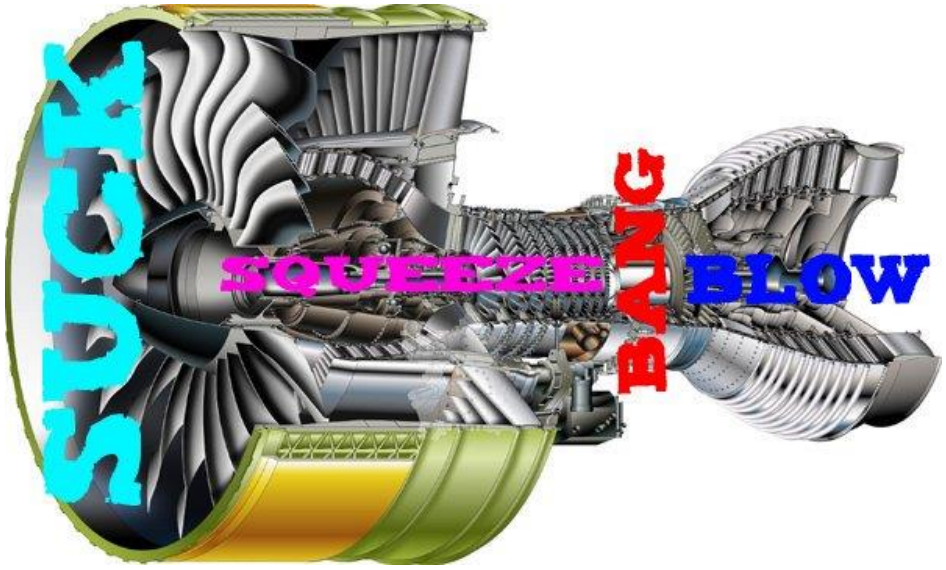
# Programma del corso



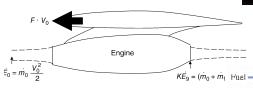


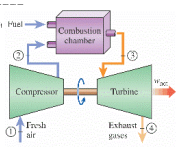
- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;



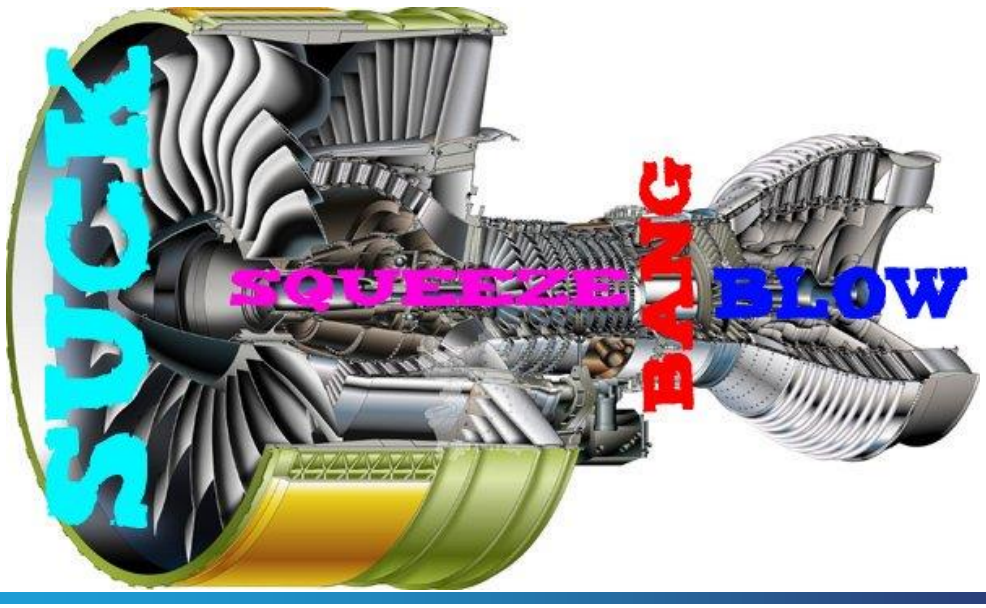


# Programma del corso

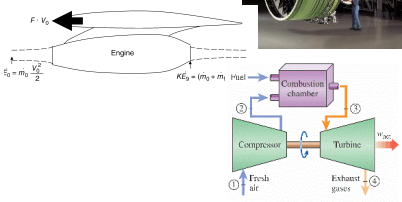




- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:

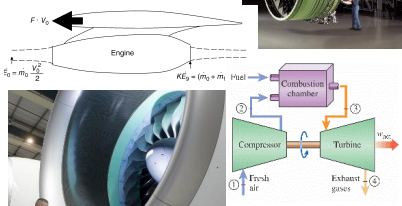


# Programma del corso

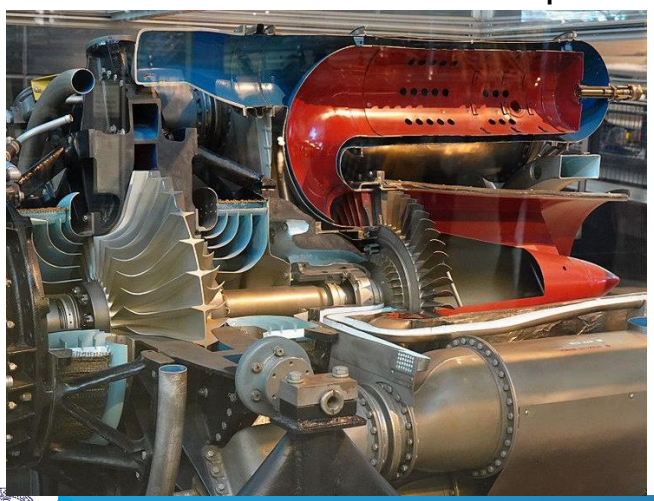


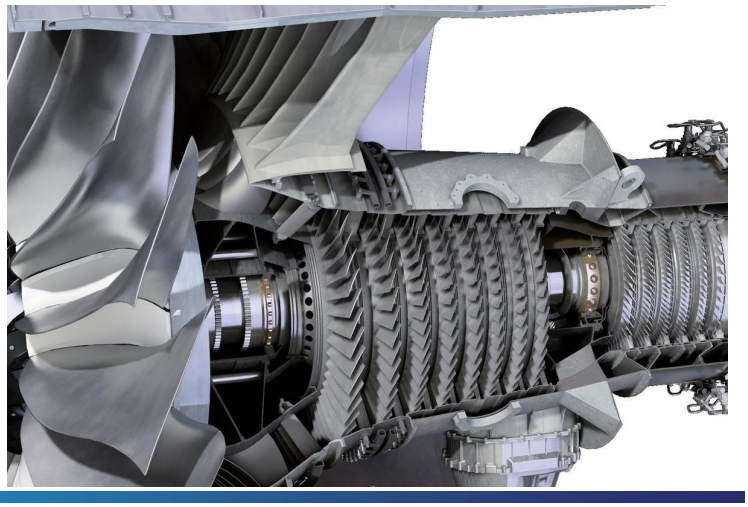
- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;

# Programma del corso

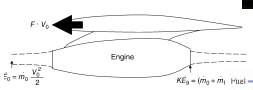


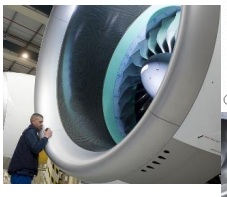
- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;
  - Compressore;

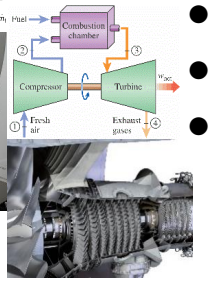




# Programma del corso







- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;
  - Compressore;
  - Camera di combustione;

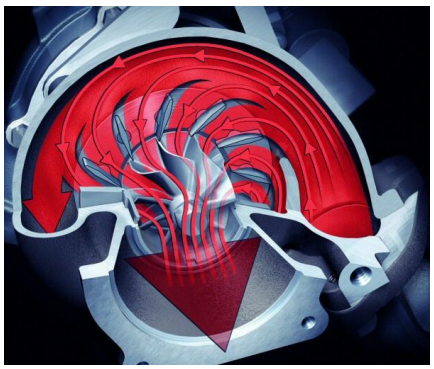
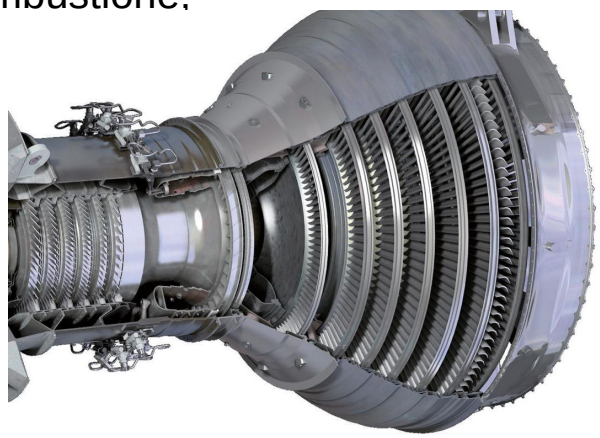
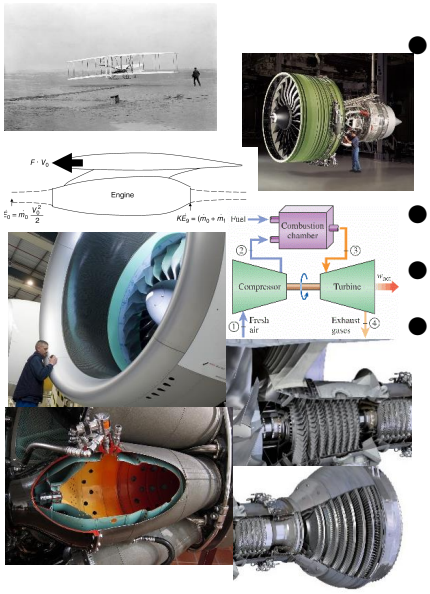
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;
  - Compressore;
  - Camera di combustione;
  - Turbina;



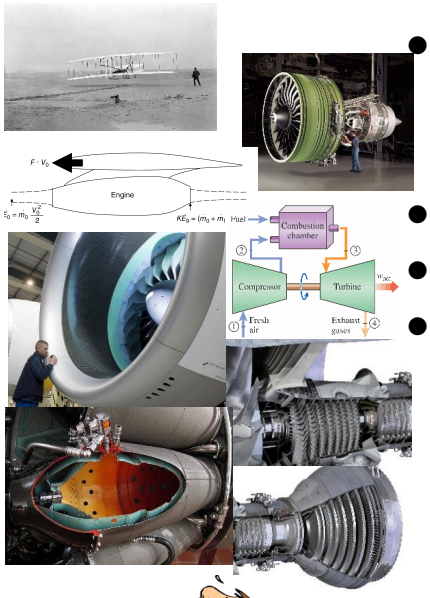


# Programma del corso



- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;
  - Compressore;
  - Camera di combustione;
  - Turbina;
- Funzionamento al di fuori delle condizioni di progetto;

# Programma del corso



- Introduzione:
  - Storia;
  - Classificazione e componenti;
- Spinta ed indici di prestazione;
- Ciclo termodinamico;
- Componenti:
  - Prese d'aria ed ugelli;
  - Compressore;
  - Camera di combustione;
  - Turbina;
- Funzionamento al di fuori delle condizioni di progetto;
- Easa cenni sui motori a pistoni
- Endoreattori convenzionali
