

Risolvere le seguenti equazioni:

$$\operatorname{arcsen} x = \frac{\pi}{4}$$

$$\text{Risposta: } \left\{ \frac{\sqrt{2}}{2} \right\}$$

$$\operatorname{arcsen} x = \frac{\pi}{3}$$

$$\text{Risposta: } \left\{ \frac{\sqrt{3}}{2} \right\}$$

$$\operatorname{arccos} x = \frac{\pi}{6}$$

$$\text{Risposta: } \left\{ \frac{\sqrt{3}}{2} \right\}$$

$$\operatorname{arctg} x = \frac{\pi}{4}$$

$$\text{Risposta: } \{1\}$$

$$\operatorname{arctg} x = \frac{\pi}{6}$$

$$\text{Risposta: } \left\{ \frac{1}{\sqrt{3}} \right\}$$

$$\operatorname{arccos} x = \frac{\pi}{4}$$

$$\text{Risposta: } \left\{ \frac{\sqrt{2}}{2} \right\}$$

$$\operatorname{arcsen} x = 0$$

$$\text{Risposta: } \{0\}$$

$$\operatorname{arccos} x = \frac{\pi}{3}$$

$$\text{Risposta: } \left\{ \frac{1}{2} \right\}$$

$$\operatorname{arcsen} x = \frac{\pi}{2}$$

$$\text{Risposta: } \{1\}$$

$$\operatorname{arcsen} x = \frac{\pi}{6}$$

$$\text{Risposta: } \left\{ \frac{1}{2} \right\}$$

$$\operatorname{arccos} x = \pi$$

$$\text{Risposta: } \{-1\}$$

$$\operatorname{arctg} x = \frac{\pi}{2}$$

$$\text{Risposta: } \emptyset$$

$$\operatorname{arcsen} x = -\frac{\pi}{2}$$

$$\text{Risposta: } \{-1\}$$

$$\operatorname{arccos} x = -\frac{\pi}{3}$$

$$\text{Risposta: } \emptyset$$

$$\operatorname{arccos} x = 0$$

$$\text{Risposta: } \{1\}$$

$$\operatorname{arctg} x = \frac{\pi}{3}$$

$$\text{Risposta: } \{\sqrt{3}\}$$

$$\operatorname{arctg} x = 0$$

$$\text{Risposta: } \{0\}$$
