

Dati i seguenti punti del piano P e Q , calcolare la loro distanza.

$$P = (0, 4) \in \mathbf{R}^2, \quad Q = (2, 2) \in \mathbf{R}^2$$

$$P = (2, 4) \in \mathbf{R}^2, \quad Q = (-1, 3) \in \mathbf{R}^2$$

$$P = (2, 4) \in \mathbf{R}^2, \quad Q = (-3, 1) \in \mathbf{R}^2$$

$$P = (2, 4) \in \mathbf{R}^2, \quad Q = (-2, -4) \in \mathbf{R}^2$$

$$P = (2, 4) \in \mathbf{R}^2, \quad Q = (0, -2) \in \mathbf{R}^2$$

$$P = (0, 4) \in \mathbf{R}^2, \quad Q = (1, -1) \in \mathbf{R}^2$$

$$P = (0, 4) \in \mathbf{R}^2, \quad Q = (3, -3) \in \mathbf{R}^2$$

$$P = (4, 2) \in \mathbf{R}^2, \quad Q = (-1, 3) \in \mathbf{R}^2$$

$$P = (4, 2) \in \mathbf{R}^2, \quad Q = (-3, 1) \in \mathbf{R}^2$$

$$P = (3, 3) \in \mathbf{R}^2, \quad Q = (-3, -3) \in \mathbf{R}^2$$

$$P = (4, 2) \in \mathbf{R}^2, \quad Q = (0, -2) \in \mathbf{R}^2$$

$$P = (3, 3) \in \mathbf{R}^2, \quad Q = (2, 0) \in \mathbf{R}^2$$

$$P = (3, 3) \in \mathbf{R}^2, \quad Q = (4, -2) \in \mathbf{R}^2$$

$$P = (-1, 3) \in \mathbf{R}^2, \quad Q = (-3, 1) \in \mathbf{R}^2$$

$$P = (-1, 3) \in \mathbf{R}^2, \quad Q = (-2, -4) \in \mathbf{R}^2$$

$$P = (-1, 3) \in \mathbf{R}^2, \quad Q = (0, -2) \in \mathbf{R}^2$$

$$P = (-1, 3) \in \mathbf{R}^2, \quad Q = (3, -1) \in \mathbf{R}^2$$

$$P = (-2, 4) \in \mathbf{R}^2, \quad Q = (4, -2) \in \mathbf{R}^2$$

$$P = (-3, 1) \in \mathbf{R}^2, \quad Q = (-2, -4) \in \mathbf{R}^2$$

$$P = (-3, 1) \in \mathbf{R}^2, \quad Q = (0, -2) \in \mathbf{R}^2$$

$$P = (-3, 1) \in \mathbf{R}^2, \quad Q = (3, -1) \in \mathbf{R}^2$$

$$P = (-4, 2) \in \mathbf{R}^2, \quad Q = (4, -2) \in \mathbf{R}^2$$

$$P = (-2, -4) \in \mathbf{R}^2, \quad Q = (0, -2) \in \mathbf{R}^2$$

$$P = (-3, -3) \in \mathbf{R}^2, \quad Q = (2, 0) \in \mathbf{R}^2$$

$$P = (-3, -3) \in \mathbf{R}^2, \quad Q = (4, -2) \in \mathbf{R}^2$$

$$P = (0, -2) \in \mathbf{R}^2, \quad Q = (3, -1) \in \mathbf{R}^2$$

$$P = (0, -2) \in \mathbf{R}^2, \quad Q = (5, -3) \in \mathbf{R}^2$$

$$P = (2, 0) \in \mathbf{R}^2, \quad Q = (4, -2) \in \mathbf{R}^2$$
